Pre-flight check

Type in the airport identifier or airport name, Aviator will start searching after the 3 characters are entered

Verify or enter the Hobbs Start

Enter the number of slots as required

Click Done to confirm preflight is complete. Additional information will appear

Additional info

The image shows a software interface for 'Additional info' with a blue header bar containing 'Client 1' and a menu icon. Below the header is a grey button labeled 'Additional Information ▲'. The main area contains several input fields with callout boxes:

- Reference:** A text input field with a callout box stating: "Enter a Contract Number or Task Order as required".
- Block Time:** A checkbox with a callout box stating: "Select, If time is being logged in Block Time(Wheels roll to wheels stop)".
- Fuel Added:** A text input field containing '0' with a callout box stating: "Fuel added prior to first flight".
- Oil Added Single/Left:** A text input field containing '0' with a callout box stating: "LH or Single engine oil added prior to first flight".
- Oil Added Right:** A text input field containing '0' with a callout box stating: "RH Oil added added prior to first flight".
